

Good morning sir, nice to meet you/I am very glad to meet you/it's a pleasure having the chance to interview you! Let's start, where do you work?	
	Good morning! Nice to meet you, too! I work in the United States/US.
How long have you lived there?	
	I've lived there for several years. In my country of origin, Greece, it's hard to find a good job in this sector/field.
What is your specific task?	
	I'm working on a project concerning solar energy.
What are the weaknesses of renewable energies these days/at the moment?	
	Costs are still too high as regards the production of energy that you can obtain from them.
Are government investing in research?	
	They are trying to do something, but it isn't always easy. However, the problem of alternative energies is becoming more and more serious and pervasive; that's why we have to go on!
I hope that the situation will get better/improve soon.	
	Thank you! I do too because we really need to do something!
